Functional Training System 360

/// Main Racks Overview

Functional Training System 360

Instructions

The functional training system features various configuration types, maximizing exercise choices and functions while minimizing space.

This innovation has transformed a dreamy fitness concept into a realistic solution for any facility.

This optimum series is suited for the current fitness trend of group training and satisfies the needs of operators at various exercise levels and abilities.

It attracts individuals seeking inventive and enjoyable workouts that spark their creativity. Each package includes not only workout accessories but also promotes wellness education.

Instructions

The power runner FPR112 comes from innovations that provide a new solution to surmount the pain points of traditional resistance training.

As a role model of CrossFit workout equipment, the FPR112 facilitates exercisers to perform various running workouts, including sprints, shuttle runs, retro running, and s-curve runs.

With a compact but sturdy construction, the FPR112 is easy to carry around and can withstand both outside and indoor environments. During exercise, the digital console accurately and instantly reflects workout data to improve fitness training efficiency and reduce the risk of injuries.
